Professional Experience

Web3 Intern Wildcard Alliance, Remote

- Worked directly under VP of Product
- Researched emerging technologies, AI tools to streamline processes, and bot prevention tools.
- Participated in startup strike team meetings, gaining hands-on exposure to early-stage product development and cross-functional collaboration.

May 2024 - August 2024

AI Intern, Sizzle-Reel, Remote

- Fixed a critical blocker in a planned roadmap to a fine-tuned agentic micro-drama script analyzer and writer
- Built a txt file annotator with user sign-in using next-auth, database storage with MongoDB, and deployed on Vercel.

August 2025 - November 2025

Agentic AI Consultant

- Taught individuals and companies claude code, openclaw, n8n, and other AI tools to help with software development, business automation, and streamline productivity workflows

January 2026 - March 2026

Projects

Sigil, deployed at si9il.com

- Solo-founded a gamified personal development platform. Built with React, Next, Express, OpenAI API, Claude API, MongoDB and MongoDB vector search.
- Combines a life organizational system with a generative gamified progression system to make productivity addictive.
- Allows freeform AI chat to plan and coordinate daily tasks, habits, projects, and long-term areas of responsibility.

AI Meeting Summarizer, Productivity Tool with Notion Integration

- Developed app that uses OpenAI APIs to auto-summarize meeting transcripts and populate a structured Notion database.
- Streamlined workflow for team productivity and note organization.

Airbnb Website, deployed at stayfourfeathers.com

- Created and deployed a static website with clear design rules and a call to action
